## Introduction

If you sell on eBay, the eBay Integration with E-commerce solution is exactly for you!

eBay Marketplace allows businesses to more effectively have their products advertised and sold online. Many E-commerce store owners also have accounts with eBay Marketplace, receiving orders from these two channels.

This system allows downloading orders from eBay to E-commerce back end. If the order status is changed in E-commerce, it's automatically changed in eBay.

Also, an Administrator of webshop can upload products of E-commerce Catalog to eBay Marketplace. Stock and Price information will be updated on eBay according to changes in E-commerce.

## Configuration

To configure your eBay in the E-commerce back end, go to the **Admin Panel > Configuration > Ebay** section.

In the appropriate fields, specify the data necessary for using the eBay Connector (use the **Edit** button to change the values in the fields).

**Domestic postage**

Royal Mail 1st Class Standard (1-2 working days)   ▼	Cost <input type="text" value="1.4900"/>	Each additional <input type="text" value="1.0000"/>
--   ▼	Cost <input type="text"/>	Each additional <input type="text"/>
--   ▼	Cost <input type="text"/>	Each additional <input type="text"/>

In the **Cost** field on the right you can specify shipping price of one item:

Royal Mail 1st Class Standard (1-2 working days)   ▼	Cost <input type="text" value="1.4900"/>	Each additional <input type="text" value="1.0000"/>
--   ▼	Cost <input type="text"/>	Each additional <input type="text"/>
--   ▼	Cost <input type="text"/>	Each additional <input type="text"/>

In the **Each additional** field, you can specify shipping price for each additional item ordered by a customer.

days)   ▾	Cost	1.4900	Each additional	1.0000
▾	Cost		Each additional	
▾	Cost		Each additional	

For example, shipping cost of one product could be \$10, and if a customer orders two products, the shipping cost would be \$15, for three products – \$20, etc. (because each additional product's shipping cost is \$5):

Cost	10	Each additional	5
Cost		Each additional	
Cost		Each additional	

There is also a possibility to setup default shipping costs for **International postage**:

**International postage**

Royal Mail Airmail (Small Packets)   ▾				Cost	3.4900	Each additional	2.0000
<input type="checkbox"/> N. and S. America	<input type="checkbox"/> Asia	<input type="checkbox"/> Australia	<input type="checkbox"/> Canada	<input checked="" type="checkbox"/> European Union

## Products

An Administrator of the website should create products for eBay by clicking on the **eBay** button located in the Products Catalog of Admin Panel. Select the product first, and then click on the **eBay** button.

The screenshot displays a product management interface. On the left, a list of products is shown with status indicators (green and red circles) and action icons (play, info). The main panel shows details for a product titled "Me To You Christmas Tatty Teddy Bear 13cm Heart". Below the title are buttons for "edit", "delete", "move", and "copy to". There are also buttons for "amazon.com" and "eBay", with a red arrow pointing to the "eBay" button. The product's "Date Added" is 08/11/2010 and "Last Modified" is 04/10/2011. A product image of a teddy bear holding a heart is shown, with the filename "G01W1926.jpg" below it.

1) To add the chosen product to eBay, select **Yes** from the dropdown list.

Your products will be uploaded to eBay automatically according to settings specified in Configuration. When the product is purchased on eBay, the system downloads an order to the webshop automatically (again, according to settings specified in Configuration).

After the system has downloaded an order from eBay, the STOCK is changed and you can see this in the Product Edit mode: either in the **Quantity** field on the **Data** tab, if a product doesn't have attributes:
